CUSTOMER QUOTE:

"(Whitetail) is a critical member of the YTC Wildlife staff and continues to set the example for others in my program and throughout the Environmental Division here at YTC. This achievement is a reflection of their organization providing high quality staff and support in meeting not only the Wildlife Program goals and objectives but also the Army Mission."

Program Manager, Yakima Training Center, Washington

Planning Services

Whitetail applies innovative methods to Environmental Planning projects and concepts. Our degreed scientists apply practical and cost-effective alternatives to projects involving most U.S. ecosystems. Our staff of biologists, environmental scientists, ecologists, and botanists have actively developed adaptive strategies that integrate all aspects of natural resource management in support of our clients' missions.

We have and are currently providing a wide range of services for environmental planning requirements related to real estate actions, military construction (MILCON), training actions, equipping actions, and federal actions. Our staff routinely integrates technology, social media, and other advances into our planning related projects and contracts including project websites and internal and external discussion forums, facilitating coordination and stakeholder involvement. Whitetail maintains a high awareness of stakeholder communication issues throughout the planning process, with the goal of developing and implementing regional, stakeholder-specific solutions with each project.

We offer the following planning-related services and expertise:

- National Environmental Policy Act (NEPA) Analysis
- Natural Resources Management
- Cultural Resources Management
- Environmental Condition of Property (ECOP) Management Support
- Forestry Management
- Geographic Information Systems (GIS)
- Environmental Assessments
- Environmental Impact Statements
- INRMPs/ICRMPs
- Records of Environmental Consideration (RECs)

Project Examples

- At Fort Jackson, SC, we conduct and track NEPA compliance inspections of project areas and construction sites, conduct Construction Site Environmental Surveys (CSEs), and complete Records of Environmental Consideration (RECs). We also attend preconstruction planning meetings/charrettes, and conduct reviews and updates to NEPA documents/records.
- For Headquarters, Army National Guard (ARNG), we supported NEPA and ECOP services for all 54 states and territories. This support included assisting with preparing and reviewing NEPA policy and guidance; technical review of ARNG NEPA documents (EAs, EISs etc.) and other planning documents (INRMPs, ICRMPs, etc.).
- Whitetail provides full-time on-site support to the NEPA program at the U.S. Army Yakima Training Center in Washington.
- Whitetail prepared an EA for Gate 4 Visitors Access Control Center at Fort Jackson; helped collect forest vegetation data for endangered species habitat management and prescribed burns; assessed conditions of red-cockaded woodpecker (RCW) clusters and associated cavity trees; and managed existing habitat for RCW, game species, and migratory birds. We also conducted awareness training for endangered species conservation and compliance.
- Whitetail provided support to the Cultural Resources program at US Army Garrison Fort Carson, Colorado. Our staff supported the Section 106 process, performed archaeological surveys and site/field evaluations; provided GIS and database management support, and performed baseline site motoring and inspections.
- For North Carolina ARNG, Whitetail updated the INRMP for the Camp Butner Training Center (CBTC). The update addressed the baseline conditions of natural resources at the CBTC and provided natural resources management program guidance.
